Here Is an Example of a GPA Calculation Method You Might Define in **OnScreen GPA Pro™**. The Ability to Define Multiple Methods Lets You Match Any School's Preference.

Schools vary on the step size for + or - in calculating GPA. You choose.

Some schools score more than 4.0 for an A+. You choose.

College admissions offices may exclude non-academic courses. Graduate schools may be only interested in upper division courses in your major. Define "other" courses as you wish and choose whether to include them.

Many high schools give extra grade points for honors and AP courses. You choose.

iPod 6:33 PM

Weighted All

Unweighted A+   = 4   > 4

Step for +/-   .30   .33

Include "Other"   Yes   No

Weighting   ON

Add to AP   1.0   0.5   0.0

Add to Hon   1.0   0.5   0.0

Add to "Other"   1.0   0.5   0.0

2X   Cancel   Done

And you choose how many extra points to assign.

Unlock this screen to allow editing. When screen is unlocked this control will lock it.

Delete this GPA method.

Make a copy of this method.

Cancel new method or changes.
